

Heal Nepal

Thank you for supporting the Heal Nepal campaign in 2019!

The UK government awarded match funding to this campaign, which meant that every pound you donated was doubled. Through your giving, you changed the future of thousands of people.

Nepal has a varied landscape and many people live in difficult-to-reach remote areas surrounded by mountains and rugged terrain. People living with leprosy in rural Nepal are often left undiagnosed because they can't access even basic healthcare. Untreated leprosy then leads to disability and prevents people from working, plunging them even further into poverty.

Heal Nepal was set up to reach these forgotten people. Thanks to your amazing generosity, they received life-changing help. Please join with us in praising God as we celebrate all you have made possible:

OUTREACH

Our health workers reached 11 districts and shared vital health messages with almost 3 million people! Each were told about the effects of leprosy and were helped to get treatment.

TRAINING

Through your support, thousands of health workers and volunteers were trained to recognise the early signs of leprosy. Their work will ensure hidden cases of leprosy will be cured for many years to come!

SKIN CAMPS

1,997 new leprosy cases were detected, through skin camps, contact tracing and self-referral.

PROTECTIVE FOOTWEAR

854 people affected by leprosy received special shoes to protect their feet, helping to prevent ulcers and disability.

SELF HELP GROUPS

3239 people joined self-help groups. They come together as a community to care for their hands and feet, save money to help with emergencies and start local businesses, and build friendships.

RECONSTRUCTIVE SURGERY

391 people benefitted from reconstructive surgery to correct disabilities caused by leprosy.

REVOLUTIONARY ULCER TREATMENT

700 people were given revolutionary ulcer treatment, helping them heal quickly and return to work.

'WE LOVE BECAUSE HE FIRST LOVED US.'

1 JOHN 4:19 NIV
